## NURSING CARE PLAN FOR TUAN

Tuan is a 25 year old man who has been injecting heroin for the past 7 years. He uses heroin 4 or 5 times every day and must steal in order to buy it. Last year he learned that he is HIV positive and this year he began to experience weight loss, fevers, and diarrhea. His CD4 count is 20. His mother brought him to the hospital because he is very weak and he was admitted to your ward.
